## Flatout 2 Split Screen Pc Mod 41 \_\_FULL\_\_

I have updated my youtube videos for the instructions on modifying the split screen to see in 4080. To split the screen vertically and have each player spawn on the new side of the screen I've used. xinput set-prop "KBD0" "Device Enabled" "0" for each player. This requires the dongle to have x-split support where each player press a button to "enable" them or use the game's menu to turn them on. Originally I just put a setting in to take off the split screen and run the game at full screen and simply have the players appear at the bottom of the screen to simulate the split screen. But now with the latest versions of flatout that support the game's menus I got the controls that you need to do the split screen function with. Glad I found this thread and it helped me by showing me the new controls. This only works in the latest version of the mod. I have tested and this mod works correctly in my laptop running windows 10 home. No effort on my part has been made to test this on other operating systems. I do not know if this will work correctly with Windows 7 or 8. I am not a game developer and I have no idea how modding would work so I hope you understand that I am just a user like all of you who want to try out something new. I also want to warn you that I have only tested this mod using three player split screen as the game has no option to set the number of players in game. I have not created a menu for this or made any menus for the game or anything else. I just added and modified the files that are pre-built into the game from the original creators. I am using flatout version 1.9 and since I do not use the built in split screen mode of the game I have modified the files accordingly. Again this is a mod that does not offer anything other than split screen for the three player option. It does not give you the option to choose between the two sides of the split screen or choose to play in full screen mode. This mod is only meant to help you use the game's menu options to activate the split screen. I am not expecting any help on this mod. I am not asking anyone to change any code or add
